

## Medical Science Liaison

Astellas Pharma Canada is currently searching for a Medical Science Liaison for the territory of Quebec and Atlantic Canada reporting to the Associate Director, Medical Science Liaison. Bilingual oral and written skills (English/French) are mandatory for this position.

### Description

The Medical Science Liaison (MSL) serves as the field scientific/medical expert in delivering the MSL mandate of facilitating non-promotional scientific exchange and translating scientific knowledge into value for patients in alignment with Astellas' corporate strategic direction. This role is responsible for the successful implementation of regional field-based medical/scientific tactics of the Therapeutic Area (TA) Medical Strategic Plan.

### Essential Job Duties

#### Stakeholder Relationship Activities:

- Lead the development and implementation of a Stakeholder Engagement Plan that addresses the medical needs of stakeholders in alignment with the TA Medical Affairs strategic plan and corporate business priorities.
- Develop trusted relationships with stakeholders that deliver non-promotional scientific/medical value in a timely manner with the goal of improving patient care.
- Investigates and understands medical landscape within the region and implement a MSL Regional Plan to address existing or future scientific gaps, in collaboration with the MSL Senior Manager and Associate Director.

#### Research Support Activities:

- In collaboration with Research Operations, identify and understand site research capabilities within assigned region.
- Identify potential investigators for upcoming research activities based upon the criteria set by the study teams.
- Conduct regional research profiling initiatives and communicate insights.
- Provide TA expertise for study sites as needed (i.e. site initiation visit, throughout the study) to identify changes in the medical landscape.
- Support Investigator Sponsored Research requests, as needed.

#### Canada Medical Plan Deliverables:

- Interpreting, applying and communicating stakeholder insights from regular field interactions to shape the medical strategy.
- Identifying and supporting international, national and regional scientific meetings, including collection of scientific insights from sessions and stakeholders.
- Supporting regional expert meetings, internal training (e.g. disease management, product info etc.), and other medical tactics.

**Non-Promotional Scientific Exchange Activities:**

- Presenting scientific data in various venues including as requested by various stakeholders including physicians, pharmacists, and formulary committees.
- Discussing approved scientific information with stakeholders regarding Astellas products and disease state management concepts as appropriate.
- Identifies opportunities/speakers for regional Medical Education events that align with the Medical Affairs TA Strategic Plan and collaborates with Medical Education to develop and implement the program, including speaker training and content development for other learning activities.

**Medical/Governance Expertise:**

- Maintains advanced scientific expertise and understanding of the relevant TA disease, Astellas pre-marketed and approved products; as well as competitor products.
- Maintains in-depth knowledge and understanding of Astellas Medical Governance framework, global and local SOPs, Innovative Medicines Canada and Health Canada guidelines.
- Ensures that all activities are compliant with medical governance guidelines and are consistent with the APCA Corporate Code of Ethics.

**Required Qualifications**

- Advanced scientific degree including Ph.D., Phar.D., MD, MSc. in a healthcare or scientific discipline.
- A high level of scientific expertise with a proven ability to interpret and effectively communicate complex clinical data.
- Consistently build and maintain trusting relationships with internal and external stakeholders to establish Astellas as a credible partner.
- Strong strategic thinking ability, operating with a sense of urgency to respond to business needs in a timely manner and solid business acumen.
- Demonstrated ability to work effectively in a matrix organization.
- Excellent interpersonal skills for successful cross-functional collaborations with internal partners is essential.
- Demonstrated independence in managing assigned projects within established timelines.
- Familiarity with all aspects of clinical trial processes.
- Knowledge and adherence to local regulatory agency (Health Canada) policies, the Innovative Medicines Code of Ethical Practices and Good Clinical Practices (GCP) guidelines.
- Complex problem solving skills.
- Able to manage a frequent travel schedule, with up to 40% overnight travel.
- Proficient in Microsoft Office.
- Bilingualism (English/French) is mandatory for this position.

**Preferred Qualifications**

- Prior MSL and therapeutic area experience is an asset.
